CANADA LTD.

... celebrating 100 Years of Continuous Mining and  
the dawn of a new and exciting project - Hoyle Deep

Porcupine Gold Mines is in the process of a Major Capital Expansion project at its Hoyle Pond Mine. The Hoyle Deep Project includes the development and construction of a new 1800m deep internal shaft (winze) as well as upgrades to the existing No. 1 Shaft. The new winze will extend to a depth of 2200m and it is expected that the project will be completed over a 4 year time period. The mine is a high grade narrow vein underground gold mine which has been operating continuously since 1985 and has produced 2.6 million ounces.

## SHAFT PROJECT SUPERINTENDENT

### Responsibilities:

Coordinate overall shaft sinking project development and construction efforts required for a major shaft project. Ensure that work is performed in a safe and cost effective manner by managing all resources required to meet the project schedule.

- Manage all direct report positions including a review of all completed work, providing direction, assigning tasks, monitoring progress, and assessing performance.
- Manage contractors to ensure all safety standards and objectives are achieved. This includes sufficient planning and all safety aspects of the management plan.

### Qualifications:

- Degree in Mining Engineering or a Technical Diploma in Mining Engineering with mining related experience
- Technical expertise with shaft engineering, design and construction experience
- Minimum 10 years of project shaft sinking and underground lateral mining development related experience
- Combination of 10 years experience at a senior supervisory level on a major shaft sinking project
- Must have strong PC skills, professional written and verbal communication skills and ability to effectively lead others

Interested applicants are invited to submit their resume by January 24, 2010.
