

Porcupine Gold Mines is currently seeking applications for the following position:

SENIOR PROJECT ENGINEER

The successful candidate will be responsible for performing a variety of engineering duties relating to the analysis and design of underground mines in various stages of development ranging from concept to feasibility. Responsibilities include: scheduling and coordinating detailed phases of the engineering work in a part of a major project or in a total project of moderate scope. The successful applicant will develop and evaluate mining plans in close collaboration with engineering, geological, and geotechnical experts. Additional responsibilities will include: preparing recommendations, summaries, schedules and cost estimates. The applicant will be planning and directing engineering assignments and interface with engineering consultants. The applicant will also develop, review and maintain engineering standards and specifications in accordance to the Mining Regulation.

The successful candidate will have a Degree in Mining Engineering with APEO registration or eligibility for registration is required with a minimum of 5 years in underground mine design experience. Excellent written and verbal communication skills are essential along with good computer, organizational and presentation skills.

Interested applicants are invited to submit their resume by
January 24, 2010.
