

Goldcorp – Éléonore Project

The **Éléonore**, property of **Opinaca Mines** (part of Goldcorp), is a project at the advanced exploration stage, located in the James Bay area (Northern Quebec). Opinaca Mines focuses on reliable and durable development which aims at ensuring a prosperous future for its partners and the nearby communities. The company is currently completing an intensive drilling and definition program of which the results will support the advancement of the project. In conjunction with exploratory work, engineering studies are presently underway to optimize the development of the project.

We are presently accepting resumes/CV's for the following addition to our team:

SENIOR MINE ENGINEER

Ref. # 60-001

Our project team is looking for a **Senior Mine Engineer** to help support development activities at the Éléonore Mining project. Reporting to the Senior Project Manager, the successful candidate will be responsible for designing, implementing and supervising the Mine Development Program to help advance the project through feasibility. In addition, the candidate will be coordinating all engineering data management activities.

Candidates must have a good knowledge of English and French, hold a university degree in Mine Engineering and be member of, or qualify for membership in, the *Ordre des Ingénieurs et Ingénieures du Québec*. They must also have experience in supervision and bloc modeling activities.

Ideally, candidates have acquired their experience in the field of underground mines and were involved professionally in multicultural and multidisciplinary workplaces.

This position will require frequent traveling to Éléonore site and elsewhere in Canada (work schedule to be determined at a later stage). This position offers a competitive range of benefits and wages.

Interested candidates are invited to submit their curriculum vitae/resume by fax or by e-mail before December 25, 2009.

Candidates must mention the posting reference number (see above).
